SUMMARY

Information Technology graduate with practical experience in backend development, IT support, and data administration. Developed a NestJS, TypeScript, and MongoDB backend service with JWT authentication, role-based access control, and Swagger documentation as an undergraduate thesis project, and deployed a village website using Laravel. Experienced in hardware and software troubleshooting, operating system installation, network and audiovisual setup, and end-user training. Proficient in Microsoft Excel and Microsoft Word for data management, reporting, and administrative documentation, with leadership experience coordinating 17 committee divisions for a national technology competition.

EDUCATION

Bachelor of Information Technology
Udayana University | Aug 2022 - Aug 2026

SKILLS

Software Development: TypeScript, JavaScript, PHP, Python, NestJS, Laravel, Next.js, RESTful API, JWT, RBAC, MongoDB, Git, Postman, Swagger

IT Support and Networking: Hardware and Software Troubleshooting, Windows and Linux Installation, LAN, Wi-Fi, TCP/IP, DNS, DHCP, Web Hosting, User Training

Data and Office: Microsoft Excel (VLOOKUP, XLOOKUP, Pivot Tables, SUMIF), Microsoft Word (Mail Merge), PowerPoint, Google Workspace, Data Entry, Inventory Management

Data and AI: Python, OpenCV, MediaPipe, LSTM, Computer Vision

Languages: Indonesian (Native), English (Professional Working Proficiency)

EXPERIENCE

Team Member
PPK Ormawa 2024, Nationally Funded Community Empowerment Program | Jun 2024 - Oct 2024
Technologies: Laravel

- Developed and deployed a village website to digitize information, public services, and community activities, contributing to backend and frontend development.
- Set up web hosting and domain, installed devices, and trained village staff to use the new system.
- Prepared program documentation, including the proposal, activity reports, and accountability report (LPJ).

Algorithm Programming Teaching Assistant
Information Technology Study Program, Udayana University | Aug 2023 - Nov 2023

- Assisted students in C programming practicums, including Calculator, Tower of Hanoi, and geometry calculation programs, helping them debug errors and understand algorithm logic.
- Explained technical concepts step by step to students with varying levels of experience.
- Prepared and checked lab computers and software before each practicum session.
- Recorded and recapped student attendance and practicum grades in Microsoft Excel.

PROJECTS

Work Order Management System, Backend Service (Undergraduate Thesis)
Udayana University | Apr 2025 - Aug 2026
Technologies: NestJS, TypeScript, MongoDB, Mongoose, JWT, Swagger

- Developed a modular backend service with NestJS and TypeScript to record, assign, and track work orders through their full lifecycle, similar to an IT ticketing and helpdesk workflow.
- Designed and implemented RESTful API endpoints across the system's core modules, with MongoDB data models built using Mongoose.

- Secured the API with JWT authentication and role-based access control for Admin, Supervisor, and Technician roles.
- Applied request validation and centralized error handling; documented the API with Swagger and tested endpoints using Postman.

Balinese Dance Detection System
Udayana University | Jan 2025 - Aug 2025
Technologies: Python, OpenCV, MediaPipe, LSTM
- Developed a computer vision system to classify Balinese dance movements from video input.
- Extracted body pose landmarks with OpenCV and MediaPipe and trained an LSTM model on the resulting movement sequences.

Bali Food Security Data Analysis
Udayana University | Jan 2024 - Jun 2024
Technologies: Microsoft Excel
- Compiled and cleaned agricultural and livestock datasets in Microsoft Excel.
- Analyzed correlations between variables and built charts to visualize production trends.
- Summarized findings into a structured report evaluating regional food security.

ORGANIZATIONAL EXPERIENCE

Vice Chairperson
ITCC 2024, National Technology Competition | Apr 2024 - Nov 2024
- Co-led and coordinated 17 committee divisions over a 7-month preparation period for a national-scale technology competition.
- Prepared and maintained the competition's technical setup, including computers, local network and internet connectivity, and projectors, and resolved technical issues during the event.
- Managed event administration, including participant data, schedules, and committee documents.

Head of Facilities and Infrastructure
Maestro FT, Faculty of Engineering Student Journalism Group, Udayana University | Dec 2023 - Jul 2024
- Managed and maintained cameras, laptops, and audio devices, ensuring equipment was ready for activities.
- Maintained an Excel-based inventory of the organization's equipment and managed equipment borrowing records.
